Globally, 1000's of networks
leverage relationships for
social change

They are piloting norm-
breaking approaches to
social impact

Nearly all are under-
funded, disconnected &
highly misunderstood

what
we
know

How can we...

build a strong sense of community and trust?

support leaders for self-organization in my network?

capture impact in a complex, ever-changing network?

deepen connections while sparking shared action?

increase engagement across our membership?

enable inclusive decision-making across our network?

pursue a common agenda across competing interests?

facilitate learning across diverse stakeholders?

strengthen a shared sense of ownership?

measure return on relationships?

maintain that "special feel" as we grow?
